Poudre School District

POUDRE SCHOOL DISTRICT R-1

Addendum 1.0

Invitation for Bid

Kitchen Hood Inspection and Cleaning Services

IFB #27-701-002

Question: Hood Cleaning only

Just wanted to clarify, are you requesting a bid for hood cleaning only, or are you also looking for pricing on the kitchen fire suppression system inspection/service? Thank you,

Answer: No. Inspection/service on the fire suppression system is excluded from this IFB.

Question: Make-up air

Please explain what is meant by proper function. Are vendors expected to have air flow readings, etc?

Answer: The inspection of Make-up air may be excluded from inspections. PSD will do measurements and inspections in-house.

Question: Mechanical Drawings

Are there mechanical drawings, showing the kitchen exhaust systems, available for

---

each school?

Answer: Mechanical drawings will be shared once the RFP has been awarded to a vendor.

Question: Site Walk?

Will there be a site walk?

Answer: A mandatory site walk for one elementary school, one middle school and one high school will be scheduled. The site visit will be on Tuesday Nov. 10th at 1:30 pm at Traut Elementary School followed by Preston Middle School then Fossil Ridge High School. Please see Addendum 1.0 Attachment 2 for additional details.

Question: Emergencies

Can you explain what might be considered an emergency that would require the vendor to be on-site within 4 hours?

Answer: Examples could be a fire or accidental release of fire suppressant

---

Question: Filter replacement

Can the filter sizes be made available?

Answer: PSD does not have the filter sizes. They are standard, universal cleanable filters for kitchen hoods. The filters will be cleaned onsite and reinstalled. Variations would require documentation supporting the need and written authorization from the designated PSD representative.

Question: Scope Clarification

To be awarded is it a requirement for the cleaning services?

Answer: Yes. Inspections will determine if cleaning is needed and it is the expectation cleaning would occur once proper documentation is provided to PSD and vendor receives written authorization. Cleaning includes hoods and filters.

Question: Site inventory: hood, fan and duct counts

Will the District provide, for each site on Attachment C, the number of kitchens, kitchen exhaust hoods, exhaust fans and separate duct systems, including any

---

culinary classroom hoods?

Answer: PSD will provide the inventory of schools, number of hoods per kitchen and when applicable, culinary arts rooms. See attached.

Question: Attachment C: site list and Eyestone South

Section 2.4 says services will be completed at each school on Attachment C. Section 1.0 names Eyestone South, which is not on Attachment C. Is Attachment C the complete list of sites to be priced, and is Eyestone South is included?

Answer: Eyestone South should be included but as noted on the list, it is a type 2 kitchen hood.

Question: Attachment D: inspection and cleaning visits

Attachment D prices inspection and cleaning as separate per-site rates. Will every site receive both in a single annual visit, or does the District expect to order inspection-only visits?

Answer: Each site is required to have an annual inspection. The inspection will determine if cleaning is needed. Cleaning will need to be scheduled at a later date than inspection which will primarily be after 2pm on school days or on non-school days that are not holidays (teacher work days).

Question: Section 3.6: June site access days and hours

Section 3.6 says the District will provide access during or outside regular working hours. During the June service window, which days of the week will sites be open, what hours will each site be available for work, and will any kitchens on Attachment C be in use for summer meal or other programs?

Answer: This will be determined at a later date and will be discussed with the awarded vendor. Summer school programs are not determined until March of each school year. Prior to spring break, PSD will provide data on which schools are red zoned for the summer and thus need inspected prior to June. Schools that could be planned for spring break March, 2027 include but are not limited to Lesher, Webber, Shepardson and Poudre High School.

Question: Attachment A: inaccessible ductwork and access panels

---

Attachment A limits duct inspection and cleaning to accessible sections. NFPA 96 Section 7.4 requires access panels so the full duct run can be cleaned, and AHJs commonly cite inaccessible duct on Compliance Engine reports. Should installation of missing duct access panels or fan hinge kits be priced at the hourly repair rate on Attachment D, or quoted case by case under Section 5.4?

Answer: Quote as case by case under Section 5.4. PFA and PSD will be consulted prior to items being added to the compliance engine and PFA may grant variations based on actual kitchen activities.

Question: Attachment E: Professional Liability requirement

Attachment E requires Professional Liability coverage of $1,000,000 per occurrence and $3,000,000 aggregate. Professional Liability is not typically carried for hood cleaning services. Please confirm whether it is required for this contract.

Answer: Due to the inspection service the District requires Professional Liability. Vendors may submit exceptions to insurance with bid submission. The District will evaluate on a case-by-case basis.

Question: Attachment D: filter exchange and per-filter cleaning lines

Attachment A includes cleaning and reinstalling filters within the annual cleaning. Attachment D also lists a Flat Fee for Filter Exchange Services and a Flat Fee for Cleaning Individual Filter. Are these for services outside the annual visit, and if so, how often and at how many sites does the District anticipate ordering filter exchange?

Answer: These services are to be provided during the annual inspection or the annual cleaning. Filters should be cleaned onsite and reused unless PSD provides written documentation for other services. These services are not outside annual services. Filters are not exchanged unless PSD provides documentation in writing of an exchange and that approval will be dependent on vendor providing adequate documentation that exchange is needed.

Question: Section 8.1: price evaluation method

For the purpose of Section 8.1, how will the District calculate each

---

bidder's total price from the lines on Attachment D?

Answer: Pricing will be elevated by the flat rate inspection and cleaning services with any additional fees.

The District reserves the right to consider pricing for minor maintenance, repairs, filters, and parts and materials during the awarding process.

Question: Section 2.3 Spring Break list

Section 2.3 says a shortlist of sites will be provided and serviced during the District's spring break. How many sites does the District expect to place on that shortlist, and which sites are they?

Answer: That will be determined closer to spring break and depends on consolidation decisions. Right now there are four but that could change between now and March. Updated lists will be provided prior to March. Schools include but are not limited to Poudre HS, Shepardson ES, Lesher MS and Webber MS.

Question: Amount of Hoods

Can you provide the amount hoods at each school?

Answer: See new attachment.

Question: Hood Systems

Good afternoon, How many kitchen hoods are at each school and what type are they? Forgive me if this info is already in the RFP, but I could not find it. Thanks,

Answer: See new attachment.
