COLORADO SPRINGS

R26-091MZ ADDENDUM #1 Q&A

1. Does the City permit labor and equipment to be billed concurrently under the Time and Materials contract? For example, may a two-person mowing crew be billed at its approved labor rate while separately billing the commercial zero-turn mower and trimming equipment used during the same service period?

- Yes any task order issued will have a fee schedule attached and can be billed that way.
- Contractors will be expected to submit itemized pricing based upon requirements as specified in the request for pricing that will go out to the vendor list on this on-call contract. T&M work will be a rare occurrence under this contract.

2. Are company trucks and equipment trailers allowable billable equipment categories under Appendix A, or are transportation and mobilization expenses expected to be incorporated into the proposed labor and equipment rates?

- Yes please list these as rates on your hourly rates sheet. Any task order issued will have a negotiated fee schedule along with the scope of work.

3. Does the City permit a minimum billable service period for individual on-call assignments, particularly when mobilization is required for smaller mowing locations? If so, is there an established minimum or may contractors propose one?

- Please add this to your hourly rates sheet. Any task order issued will have a negotiated fee schedule along with the scope of work.

4. Is travel time between City-assigned mowing locations billable when multiple sites are serviced under the same work authorization? Is travel from the contractor's facility to the initial work location considered a reimbursable expense?

- Please add this to your hourly rates sheet. Any task order issued will have a negotiated fee schedule along with the scope of work.
- Contractors will be expected to submit itemized pricing based upon requirements as specified in the request for pricing that will go out to the vendor list on this on-call contract. T&M work will be a rare occurrence under this contract.

5. Appendix A requests cost-plus markup percentages for materials and products. However, the sample contract appears to restrict additional markup on reimbursable materials. Could you clarify whether contractors should propose a fixed materials markup percentage and whether subcontractor services may include an approved administrative or management markup?

- Please add this to your hourly rates sheet. Any task order issued will have a negotiated fee schedule along with the scope of work.

6. May an offeror identify commercial mowing equipment that will be acquired and placed into service upon contract award, provided the equipment is available before the applicable work begins?

- Yes – This is a great demonstration of your capacity in the proposal.

7. To assist with staffing and equipment planning, can the City provide an estimated annual mowing workload, anticipated number of service locations, or historical utilization under similar on-call agreements? Additionally, does the City anticipate recurring scheduled mowing assignments, individual work orders issued as needed, or a combination of both?

- The purpose of this RFP is to establish a list of qualified contractors that will be awarded (task orders) for entire districts, properties, trail systems, etc. They will be very detailed with maps and schedules, generally for an entire season with renew options for multiple years. For 2027 alone the city looking to award well over $700,000 in mowing task orders under this new contract.

8. Does the City prefer individual labor and equipment rates only, or may offerors also provide combined crew rates as an alternative pricing option?

- You may provide both crew rates in your hourly rates sheet.

9. Our company is a new company and does not yet have three completed commercial landscaping contracts, I personally have experience managing approximately 25–30 commercial properties across Northern Denver to metro Denver and down south through my previous employment with another landscaping contractor for years. Would the City consider relevant management experience and references from them when evaluating a newer company's qualifications, or must the three projects have been completed directly under the bidding company's name?

- Yes, include this information in your proposal for committee review. Contractors are urged to provide some representation of current workload capacity, staffing levels, equipment, etc. as well as actual experience managing large commercial mowing operations.

10. Appendix A asks for a cost-plus markup percentage on materials, while the sample contract states that materials carry no added profit. Which governs for task-order pricing?

- Appendix A will show the markup and any task order scope and fee will show the markup in the total cost.

- Contractors will be expected to submit itemized pricing based upon requirements as specified in the request for pricing that will go out to the vendor list on this on-call contract. T&M work will be a rare occurrence under this contract.
-

11. Exhibit 1 and the sample contract state different insurance requirements. Which limits apply at award?

- Exhibit 1 limits apply.

12. Exhibit 1 asks for three current contracts. May a prime contractor satisfy this with the current contracts and references of its named mowing subcontractor, with the subcontractor identified in the proposal as the RFP requires?

- Yes

13. Do you have an excel file you could send bidding contractors? The one that is shown in the RFP we be great to have so we could put in our costs to get our numbers.

- The spreadsheet and maps included in the RFP are for reference only. These are examples of the pricing packages that will go out to vendors that get awarded this contract for issuing the actual task orders to get the work done.
- We can include an excel format if a contractor wants to include that as an example of potential pricing of a task order.

-

14. Do you a have an example of a projected schedule of tasks, occurrences, and or service dates? We understand this is on a as needed on call basis but were wondering if there were ballpark schedule / occurrence dates.

- The purpose of this RFP is to establish a list of qualified contractors that will be awarded (task orders) for entire districts, properties, trail systems, etc. They will be very detailed with maps and schedules, generally for an entire season with renew options for multiple years. For 2027 alone the city looking to award well over $700,000 in mowing task orders under this new contract.

15. How many areas per year do you plan to award to a single contractor?

- Under this contract, areas will awarded on a case by case basis, but, for example the entire Briargate GID (example in RFP) would be awarded to one contractor (not split the district up). For urban trail native mowing, we will most likely group entire trail systems together i.e. “Homestead Trail segments 1 – 16” or possibly combine multiple trail systems in a task order package

16. I'm assuming we need to bid for 1 occurrence per service type for each designated area and not for the entire season?

- - The purpose of this RFP is to establish a list of qualified contractors that will be awarded (task orders) for entire districts, properties, trail systems, etc. They will be very detailed with maps and schedules, generally for an entire season with renew options for multiple years. For 2027 alone the city looking to award well over $700,000 in mowing task orders under this new contract.
