Notice of Request for Proposals
City and County of Denver
Denver Human Services
Facilities Safety & Security
On-Call Security Access Control Services

Denver, Colorado October 15, 2026

The City and County of Denver (City), through Denver Human Services (DHS), Facilities Safety & Security (FSS), is seeking proposals from qualified physical security systems integrators to provide maintenance, repair, installation, configuration, licensing, technical support, system expansion, and related professional services for DHS's existing LenelS2 NetBox access control environment and associated security infrastructure. The successful provider will be required to support and maintain the City's existing LenelS2 NetBox environment and associated field devices, including access control nodes, card readers, electronic locking hardware, panic and duress devices, and related infrastructure. Services may also include future integration with other City security technologies, including video management and related physical security systems.

The total funding available for award through this Request for Proposals (RFP) is not to exceed (or estimated at) **$450,000**. The City intends to execute contracts with one or more organizations and reserves the right to negotiate all final contract amounts. The anticipated initial contract term is **May 1, 2027**, through **April 30, 2030**, with the possibility of subsequent extensions that will be contingent on need, performance, and availability of funds.

Parties interested in submitting a proposal are required to follow the guidelines and instructions contained in this RFP. If you are unable to download the RFP packet, please contact DHS Contract Administrator, **Hung Nguyen – Hung.Nguyen@denvergov.org & DHS_Contracting_Services@denvergov.org.**

Respondents must **ONLY** rely on documents provided on the Rocky Mountain E-purchasing System (BidNet®) or as communicated directly from the DHS Contract Administrator.

Only proposals that are received by the due date/time will be considered.

Proposals are due and must be received by 3:30 P.M. Mountain Time on **November 19, 2026.**

City Solicitation Contact

City RFP Contact
Hung Nguyen, Contract Administrator Denver Human Services 1200 Federal Blvd. Denver, CO 80204 E-mail: Hung.Nguyen@denvergov.org & DHS_Contracting_Services@denvergov.org

Solicitation Schedule

Milestone	Details	Date
RFP Released	The RFP packet may be obtained electronically by visiting www.bidnetdirect.com. There is no cost to register on BidNet®[1].	10/15/2026
Information Session	Pre-bid in-person information session offered to all interested potential respondents. See "Information Session" section on page 4 for registration information	11/3/2026
Written Questions Due	All written inquiries must be submitted electronically via BidNet®. Questions must include Respondent's name, organization, telephone number, and email address.	11/6/2026
City Response to Questions	Questions will be answered and posted on BidNet® by DHS, making City responses to questions equally available to all Respondents.	11/12/2026
Proposal Due Date	Completed proposals must be submitted electronically through BidNet® (www.bidnetdirect.com) on or before the proposal due date.	11/19/2026 @ 3:30 P.M. Mountain Time
Proposal Reviews	Technical review and Review Committee activities for all applications received by the due date.	12/31/2026
Notice of Award (tentative)	Respondent(s) selected for award will receive award notices from DHS by email.	1/8/2027
Estimated Contract Start Date	Following contract negotiations with selected Respondent(s), the final contract(s) will be processed and executed.	No earlier than 5/1/2027

[1] Please note that BidNet® does offer notification services for a fee, but those services are not needed to view posted governmental bids. It is the responsibility of the Respondent to evaluate and select the service option of their choice.

Information Session

Interested respondents are invited to attend a pre-bid in-person information session at Denver Human Services, Castro Building, at 1200 Federal Blvd. 1st Floor, Denver, CO 80204. Attendees will have an opportunity to ask questions and receive a controlled overview of the DHS's existing access control environment and inspect representative equipment and infrastructure as determined appropriate by DHS. For security reasons, DHS may restrict access to specific systems, equipment, configurations, credentials, network information, security-sensitive locations, or other information. Photography, video recording, audio recording, connection of external devices, and unauthorized documentation of security-sensitive equipment or configurations are prohibited unless expressly authorized by DHS.

Due to the security risk this may impose, respondents must register with DHS Contract Administration and must submit a signed Non-Disclosure Agreement (NDA) by and for each individual prior to attending.

****Attendance is not required in order to submit a proposal****

Information Session 1 – November 03, 2026 @ 12:00 P.M. Mountain Time

To Register:
Send an email to DHS_Contracting_Services@Denvergov.org to include the following: Subject: Access Control RFP Pre-bid information Session Registration for [your organization name] Body: First and last name and the title for all attendees from your organization. Attachment: A signed NDA for each individual attending. *(Blank NDA form is included as Attachment 8 to this RFP)*

The Q&A portion of the information session will be documented to ensure accurate transcription of all questions and DHS responses. All Q&A from the information sessions will be captured in writing and posted to BidNet no later than November 12, 2026.

Accessibility

Contact the City's Deaf and Hard of Hearing Services team to request ADA accommodation for the information session. Sign language interpreters and real-time captioning via CART are available upon request with three (3) business days' notice. To request this service, please email deafhhservices@denvergov.org.

DENVER
HUMAN SERVICES

I. Background and Overview

A. Denver Health Services (DHS) Overview

DHS provides essential support to residents of the City and County of Denver by offering a range of programs and services designed to protect and empower vulnerable populations. DHS works to improve the safety, security, and well-being of Denver's residents by administering public assistance programs, child welfare services, and adult protection programs. DHS operates from multiple facilities across the city, each requiring robust security measures to safeguard staff, clients, and visitors.

DHS's strategic vision includes providing safe and welcoming environments for all who engage with their services. To support this vision, the Facilities & Securities Division is responsible for managing security infrastructure, including access control systems, video surveillance, and emergency response technologies.

B. Access Control Overview

The DHS Security Team is responsible for ensuring that access control systems across multiple DHS locations operate effectively and securely to protect staff, clients, and visitors. DHS facilities experience high volumes of foot traffic, including clients seeking assistance and employees working in various capacities to serve the community. Maintaining secure and controlled access is critical to ensure the safety of all individuals within these facilities and to protect sensitive information and assets.

In the past and currently, access control services have been managed through a dedicated third-party provider responsible for system installations, maintenance, repairs, and software updates. While this partnership has successfully supported the department's security needs, the City seeks to ensure continued system reliability, proactive maintenance, and scalability through this RFP process. The goal is to further enhance the department's access control infrastructure and meet the evolving security requirements of DHS facilities.

DHS currently operates LenelS2 NetBox as its primary electronic access control platform across multiple facilities. The existing environment includes LenelS2 access control equipment and associated card readers, electronic locking hardware, panic and duress devices, servers, software, licensing, and related infrastructure. DHS also operates separate physical security technologies, including video management systems, that may require coordination or integration during the term of the resulting agreement. This solicitation is intended primarily to provide continued support, maintenance, expansion, and lifecycle services for the existing LenelS2 NetBox environment. DHS is not seeking wholesale replacement of functional City-owned access control infrastructure as part of this procurement.

Current system specification:

i. Number of Facilities Covered: 4 primary DHS sites and 1 satellite office.
ii. Number of Access Points: Approximately 207 controlled access points and approximately 40 panic/duress devices as of the date of solicitation. Quantities are provided for informational purposes and may change during the contract term.

Recent initiatives have included:

i. Conducting comprehensive security audits to identify vulnerabilities in existing systems.
ii. Upgrading access control hardware and software to improve system performance and reduce downtime.
iii. Implementing security enhancements in response to increased safety concerns from DHS staff and clients.

C. Summary of Service Need

The Denver Human Services Facilities & Securities Division is seeking proposals for comprehensive access control services to ensure the safety and security of its buildings and staff. The challenge lies in ensuring that the access control systems are consistently reliable, fully functional, and capable of adapting to evolving security threats and organizational needs. Failure to maintain high-quality access control services could result in unauthorized access, increased security risks, disruptions to daily operations, and diminished confidence from staff and clients in the overall safety of DHS facilities.

Additionally, aging infrastructure, software updates, and equipment replacements pose ongoing challenges that require a proactive approach to maintenance and troubleshooting. DHS requires a dedicated provider capable of delivering high-quality service to prevent system downtime, improve response times to service requests, and provide expert recommendations for future system enhancements.

Through this procurement, DHS seeks to mitigate the challenges above by securing a qualified access control provider that can ensure uninterrupted, secure access to facilities, maintain compliance with security protocols, and provide the flexibility to expand and improve systems as needed. The awarded provider will play a key role in helping DHS maintain a safe, welcoming environment for both staff and the community they serve.

D. Objectives

i. Ensure Security and Access Control Reliability
Ensure all access control systems, including card readers, panic buttons, and door locks, are consistently operational, secure, and reliable across all DHS facilities.

ii. Swift Response Times for Maintenance and Repairs
Minimize system downtime by ensuring timely and effective responses to maintenance requests, troubleshooting, and equipment repairs.

iii. Support Lifecycle Management, Expansion, and Scalability
Maintain and enhance the City's existing LenelS2 NetBox environment while supporting future expansion, lifecycle replacement, software upgrades, integrations, and emerging security requirements.

iv. Maintain Compliance with Security Policies and Protocols
Ensure that access control systems remain compliant with City and County security policies and relevant regulatory standards.

v. Enhanced Safety and User Experience
Create a secure environment that is welcoming to staff, clients, and visitors by maintaining efficient and user-friendly access control systems.

II. Scope of Work

A. Scope Overview
The awarded access control provider ("Contractor") shall be responsible for delivering comprehensive, reliable, and scalable access control solutions to support the safety and security of DHS facilities. The work will involve system maintenance, upgrades, troubleshooting, and providing expert guidance on future improvements. Below are the key areas of responsibility for the Contractor:

i. Transition and Implementation
   a. During any transition of controls/responsibilities, coordinate an orderly transition of services without disruption to DHS security operations. Within ten (10) business days following execution of service contract, or another timeframe approved by DHS, provide a transition plan addressing, at minimum:
      1. Project and account staffing.
      2. Manufacturer authorization and licensing transition.
      3. Administrative access and credential transfer.
      4. Review and validation of existing system documentation.
      5. Inventory verification.
      6. System health and configuration review.
      7. Outstanding service issues and active projects.
      8. Technical coordination with DHS, Technology Services, General Services, manufacturers, and other City contractor(s), as applicable.
      9. Continuity of emergency support.
      10. Identification of transition risks and mitigation measures.
      11. Transition shall not require wholesale replacement of functional City-owned LenelS2 or other security infrastructure in place.
   b. Upon expiration, termination, or transition of the agreement, cooperate with DHS and other City security/technology providers to facilitate an orderly transition without interruption to security operations. Provide/return all City-owned documentation, current configurations, administrative credentials, inventories, drawings, backups, licensing information, maintenance records, open service records, warranty information, and other information reasonably necessary to continue operation and support of the City's systems.

ii. System Maintenance and Support
   a. Provide ongoing maintenance and support services for all access control systems, including but not limited to:
      1. Card readers
      2. Door locks
      3. Panic buttons
      4. Alarm systems
      5. Intrusion detection systems

b. Ensure all systems remain operational, secure, and compliant with applicable security policies. Services will include proactive maintenance, routine inspections, and timely repairs to prevent system downtime and ensure continuous functionality.

iii. Emergency Service and Troubleshooting
   a. Provide a 24/7 emergency support service to address any critical access control issues that may arise.
   b. Ensure a response time of no more than four hours for critical service requests.
   c. Provide troubleshooting services to diagnose and resolve system malfunctions promptly.
   d. Maintain a service log detailing issue resolution and system performance updates.

iv. System Upgrades and Future Scalability
   a. Identify, recommend, and implement upgrades to ensure the access control system remains current and scalable to meet future security needs.
   b. Conduct system assessments and propose upgrades to hardware and software as needed.
   c. Ensure that all new installations and upgrades are compatible with existing systems and infrastructure.
   d. Provide recommendations for integrating additional security measures (e.g., biometric readers, video integration) as needed to improve security posture.

v. Reporting and Documentation
   a. Provide regular report(s) on system performance, maintenance activities, and incident responses.
   b. Submit quarterly performance reports detailing system uptime, maintenance activities, and identified security risks.
   c. Maintain documentation for all system changes, including updates, repairs, and upgrades.
   d. Provide detailed incident reports following any significant security events or system failures.

vi. Staff Training and Knowledge Transfer
   a. Provide training to DHS staff on the operation and basic troubleshooting of the access control system.
   b. Conduct initial training sessions for key staff upon installation of new systems or upgrades.
   c. Provide ongoing support and resources to ensure staff are knowledgeable about system functionality and security protocols.
   d. Offer training materials and documentation to support staff self-sufficiency in managing routine system operations.

vii. Compliance and Security Standards
   a. Ensure that all access control systems comply with local, state, and federal security standards and regulations.

b. Conduct regular audits to ensure compliance with security policies.
c. Provide recommendations for policy updates to align with best practices in physical security management.
d. Ensure systems are configured to maintain compliance with data privacy and access control standards.

viii. Collaboration and Communication
a. Work closely with DHS Facilities & Securities Division staff to ensure a seamless working relationship.
b. Designate a dedicated account manager to serve as the main point of contact.
c. Schedule regular check-in meetings to review system performance, discuss security concerns, and plan for future enhancements.
d. Provide recommendations for improving access control protocols based on evolving security needs and industry best practices.

ix. Additional Services
a. Provide additional services, as needed, to support the security infrastructure of DHS facilities. These services may include, but are not limited to:
1. Installing additional access points or security devices.
2. Integrating video surveillance with access control systems.
3. Supporting emergency preparedness drills and exercises by ensuring access control systems function as expected.

B. Services to be Provided.
The Contractor shall deliver ongoing maintenance, support, system upgrades, and related services to ensure the security and functionality of DHS access control systems. The Contractor shall be responsible for ensuring continuous system performance, minimizing downtime, and proactively addressing security needs. Below is a detailed breakdown of the core services to be provided by the Contractor:

i. Preventive Maintenance
a. Within thirty (30) days of contract commencement, submit a preventive maintenance plan for DHS approval.
1. The plan shall identify recommended inspection intervals, covered equipment, testing procedures, device health verification, software and firmware review, applicable power and battery inspection, system backup verification, documentation requirements, and procedures for identifying lifecycle and obsolescence risks.
b. Perform preventive maintenance in accordance with applicable manufacturer recommendations and the schedule approved by DHS.
c. Document deficiencies identified during preventive maintenance and provide recommended corrective actions, including estimated cost and priority when applicable.
d. Deliverable: Preventive maintenance report following each scheduled preventive maintenance cycle.

ii. Emergency Repairs and Support Services
   a. Availability: Provide 24 hours per day, 7 days per week, 365 days per year emergency technical support for critical access control issues.
      1. Critical Issue Definition: Critical issues may include complete access control system outages, failures affecting multiple controlled access points, inability to secure a DHS facility or critical area, failure of critical panic or duress functionality, or another condition designated by DHS as creating an immediate security or operational risk.
   b. Acknowledgment: Critical service requests shall be acknowledged by a qualified representative within thirty (30) minutes of notification.
   c. On-Site Response: When DHS determines that on-site technical response is required, qualified technical personnel shall arrive on site within four (4) hours unless an alternative response is approved by DHS.
   d. Non-Critical Requests: Non-critical service requests shall receive an initial response no later than the next business day.
   e. Tasks:
      1. Diagnose and repair system malfunctions.
      2. Replace faulty hardware components.
      3. Restore system functionality promptly to minimize downtime.
   f. Deliverable: Incident reports submitted within 24 hours of resolving any emergency repair, detailing the cause of the issue and corrective actions taken.

iii. System Upgrade and Expansion Services
   a. Frequency: As needed, based on system assessments and evolving security requirements.
   b. Scope: Identify opportunities to improve and expand the access control system to enhance security measures.
   c. Tasks:
      1. Replace outdated hardware and implement new technologies to improve system performance.
      2. Integrate new security features such as biometric readers or mobile credentialing.
      3. Ensure all upgrades are compatible with existing infrastructure.
   d. Deliverable: Upgrade plans and proposals submitted for review, including cost estimates, timelines, and the impact on operations.

iv. Reporting and Documentation
   a. Frequency: Quarterly and as needed for specific incidents.
   b. Scope: Maintain detailed records of all system activities, including maintenance, repairs, upgrades, and incident responses.
   c. Tasks:
      1. Submit quarterly performance reports detailing system uptime, service requests, and completed tasks.
      2. Provide incident reports for any critical security events.
      3. Maintain comprehensive documentation of system configurations and updates.

4. Coordinate with appropriate department(s) to ensure current system configuration information and recoverable backups are maintained in accordance with applicable City requirements.
5. Following material configuration changes, system upgrades, or other work affecting system recoverability, verify that required configuration documentation and backups have been updated.
6. Document backup verification and any identified recovery risks in the applicable service or project record.

d. Deliverable: Comprehensive reports and documentation submitted to DHS Facilities & Securities Division.

v. Staff Training and Knowledge Transfer
   a. Frequency: Initial training upon system upgrades and annual refresher courses.
   b. Scope: Ensure DHS staff are equipped to operate and troubleshoot the access control system effectively.
   c. Tasks:
      1. Conduct hands-on training sessions for key staff members.
      2. Provide user guides and training materials.
      3. Offer ongoing support to address staff questions and provide best practices.
   d. Deliverable: Training completion certificates and copies of training materials provided to DHS.

vi. Estimated Volume of Services:
   a. Number of facilities covered: 4 primary DHS sites and 1 satellite office.
   b. Number of access points: Approximately 207 controlled access points and approximately 40 panic/duress devices as of the date of solicitation.
   c. Estimated number of service requests: Approximately 4 non-critical service requests per month and 4 emergency service requests per quarter.

vii. Key Milestone Deliverables:

Milestone	Due Date	Deliverable
Initial System Audit	Within 30 days of contract start	Comprehensive audit report with findings and recommendations
Quarterly Maintenance Checks	Every 3 months	Maintenance reports detailing system status and completed tasks
Emergency Repair Response	As needed	Incident reports within 24 hours of resolution
System Upgrade Proposals	As identified	Proposals for system upgrades and enhancements
Annual Compliance Audit	Annually	Security audit report with recommendations

viii. Task-Order Services
   a. Non-recurring repairs, installations, system expansions, equipment replacements, integrations, upgrades, and other projects may be performed through individual task orders issued under the resulting agreement.
   b. Upon request by DHS, the Contractor shall provide a written scope and cost proposal identifying the recommended work, equipment, estimated labor hours, applicable contract labor rates, applicable equipment pricing and discounts, schedule, and total not-to-exceed amount.
   c. Work shall not commence until required City authorization has been provided, except for emergency work expressly authorized by DHS.

C. Existing System Compatibility and Manufacturer Support
   i. DHS currently operates a LenelS2 NetBox access control environment. The Contractor shall be capable of maintaining, configuring, programming, troubleshooting, repairing, expanding, and upgrading the existing LenelS2 NetBox environment.
   ii. The Contractor shall support existing functional City-owned LenelS2 equipment and associated infrastructure. A change in Contractor shall not, by itself, constitute justification for replacement of functional City-owned equipment.
   iii. Any proposed replacement of existing equipment shall include documented technical justification and shall be subject to DHS approval before purchase or installation.
   iv. The Contractor shall maintain access to applicable manufacturer technical support, software, licensing, firmware, replacement equipment, documentation, and escalation resources necessary to support the City's environment.
   v. All newly installed equipment shall be compatible with the City's existing environment unless DHS provides written authorization for an alternative.
   vi. The Contractor shall coordinate with DHS, Technology Services, General Services, other City agencies, manufacturers, and other City contractors when required to support system interoperability, network connectivity, cybersecurity, licensing, integrations, and project implementation.
   vii. The Contractor shall not implement proprietary passwords, configurations, licensing arrangements, technical restrictions, or other mechanisms that prevent the City or a subsequent authorized contractor from administering or supporting City-owned systems.

D. Minimum Technical Qualifications and Certifications
   i. The Contractor shall maintain the following minimum qualifications throughout the term of the agreement:
      a. Current LenelS2 Certified NetBox Value Added Reseller (VAR) status, or the current manufacturer-authorized equivalent applicable to the City's LenelS2 NetBox environment.
      b. Current LenelS2 NetBox technical certification for personnel assigned to perform configuration, programming, installation, troubleshooting, maintenance, or upgrades to the City's LenelS2 NetBox environment.
      c. A minimum of two (2) LenelS2 NetBox-certified technical personnel available to support the City's account.

1. Preferably, Contractor shall have a minimum of three (3) additional certified technical personnel on staff to provide back-up support.

d. Demonstrated experience supporting LenelS2 NetBox access control environments of comparable size and complexity.

e. Criminal Justice Information Services (CJIS) certified Support Engineers.

f. Ability to obtain and support applicable LenelS2 software licensing, updates, manufacturer technical support, replacement equipment, and technical escalation.

ii. Required certifications and manufacturer authorizations shall remain current throughout the contract term.

iii. Respondent shall submit documentation demonstrating compliance with the above requirements with their proposal (include as Proposal Response attachment). The City reserves the right to independently verify certifications and manufacturer authorization.

iv. Respondent shall identify key technical personnel proposed to support the DHS account and provide their role, relevant experience, manufacturer certifications, current certification status, and a copy of their most recent resume (include as Proposal Response attachment).

v. Substitution of key certified personnel after award shall require replacement personnel with substantially equivalent qualifications.

E. Preferred Technical Qualifications

In addition to the minimum qualifications above, the City will consider relevant qualifications demonstrating the ability to support future physical security integration and expansion. Preferred qualifications may include:

i. Current Milestone Systems partner status and/or Milestone-certified technical personnel.

ii. Axis Communications partner status and/or Axis-certified technical personnel.

iii. Cisco Certified Network Associate (CCNA) or comparable networking certification among personnel available to support the City's account.

iv. Demonstrated experience integrating LenelS2 NetBox with enterprise video management systems and other physical security technologies.

v. Relevant manufacturer certifications for intercom, video surveillance, identity management, duress, intrusion detection, analytics, wireless locking, or other physical security technologies proposed for use by DHS.

F. Key Performance Indicator Metrics.

i. The City is interested in identifying metrics to work collaboratively with the Contractor to monitor and improve performance during the life of the contract.

ii. The City has identified the following initial metrics of interest and looks forward to working with the Contractor to add to or refine this list during contract negotiations.

a. Service-Level Compliance – Contractor shall meet the contractual acknowledgment and response-time requirements for at least 95% of service requests during each reporting period. All missed service levels shall be documented with the cause, corrective action, and resolution.

b. Core System Availability – Contractor shall support a target of at least 99% availability for Contractor-supported core access control services, excluding scheduled maintenance approved by DHS and outages demonstrably caused by systems or circumstances outside the Contractor's reasonable control. The final measurement methodology and applicable exclusions will be established during contract negotiations.

c. Project Schedule Performance – Contractor shall complete at least 95% of authorized project milestones by the mutually agreed completion date, excluding documented delays attributable to City-directed changes, force majeure, manufacturer supply constraints, or other circumstances approved by DHS.

d. Integration Performance – Where access control-to-video or other physical security integrations are authorized by DHS, Contractor shall configure, test, document, and maintain the integration in accordance with approved requirements and applicable manufacturer specifications.

iii. The final set of performance metrics and frequency of collection will be negotiated prior to the finalization of an agreement between parties and may be adjusted overtime as needed.

G. Contract Performance Management.

i. The Contractor will be subject to contract performance management and monitoring activities.

ii. Per City contract, Contractors are required to permit the City to carry out reasonable activities to review, monitor, and evaluate any of the procedures used by Contractor in providing or supplying services and make available for inspection all notes and other documents used in performing the services as described in the contract.

iii. Monitoring can be performed by the City throughout the term of the contract as follows:

a. Program or Managerial Monitoring – a review of the quality of services being provided and the effectiveness of those services to address the needs of the program.

b. Contractor Monitoring – a review and analysis of current program information to determine the extent to which Contractor is achieving established contractual objectives and goals.

c. Compliance Monitoring – a review to ascertain if the terms of the contract, including any applicable federal, state and city legal requirements, are met.

d. Financial Monitoring - a review to ensure that costs are allocated and expended in accordance with the terms of the contract and may include site visits and inspection of invoicing procedures.

iv. If, as a result of an audit or review relating to the fiscal performance of the Contractor including those performed by a DHS internal auditor, the City receives notice of any irregularities or deficiencies in said audits, the Contractor shall correct all identified irregularities or deficiencies within the time frames designated in the City's written notice of irregularities or deficiencies. If the identified irregularities or deficiencies cannot be corrected by the date designated by the City, then the Contractor shall so notify the City in writing and shall identify a date that the Contractor expects to correct the irregularities or deficiencies; provided, however, that the irregularities or

deficiencies shall be corrected no later than ninety (90) days from the date of the City's notice.

v. As part of the City's commitment to improved outcomes, the City seeks to actively and regularly collaborate with Contractors to enhance contract management, improve results, and adjust service delivery based on learning what works. Reliable and relevant data is necessary to drive service improvements, facilitate compliance, inform trends to be monitored, and evaluate results and performance. As such, the City reserves the right to request/collect other key data and metrics from vendors.

H. Administrative Requirements.

i. Policies and Procedures

Upon request and as relevant to the services to be provided, the Contractor must provide to the City a current, dated copy of their organizations policies and procedures. Contract monitoring activities typically include monitoring to ensure Contractor is fulfilling their own policies and procedures.

a. The City anticipates requiring the following policies and procedures:
   1. Documentation Policies and Procedures
   2. Performance Reporting Policies and Procedures
   3. Human Resources Policies and Procedures
   4. Nondiscrimination Policies
   5. Grievance Policies
   6. Financial Policies and Procedures
   7. Data Confidentiality, Retention, and Destruction Policy
   8. Privacy, security, and confidentiality policies

ii. Record-keeping.

a. The Contractor is responsible for record-keeping for all relevant service areas, including that the Contractor shall:
   1. Work collaboratively with City personnel to collect and retain all program information necessary to ensure compliance with the requirements of any applicable state or federal law and program regulations. This includes all service records (paper and automated).
   2. Establish and maintain record-keeping policies in accordance with the requirements established by applicable federal and state law or as reasonably required by the City, including the City Auditor, concerning the provision of services and expenditure of City Funds, including, but not limited to, establishing and maintaining financial and performance records with respect to all matters covered by this contract in sufficient detail and in a manner sufficient to conform to generally accepted accounting principles so as to allow audit of the expenditure of City funds received by the Contractor.
   3. Retain such financial and performance records for a period of six (6) years from the date of final payment to the Contractor under the contract.

iii. Technology and Data.

a. The Contractor must have the capability to sustain a sophisticated and secure technology structure to implement and maintain data collection and record-keeping. This includes any City provided data in order to prevent a breach of City client and/or City information.

III. Organizational Eligibility

A. Proposals will be accepted from public, private non-profit, or private for-profit organizations, which meet at least one (1) of the following criteria:
   i. Governmental entity;
   ii. Corporation, LLP, LLC or other firm located, registered, and in good standing in the State of Colorado; or
   iii. Foreign corporation, LLP, LLC, or other firm registered with the Colorado Secretary of State and in good standing.

B. The City prefers local organizations when considering applications to award for the services described in this RFP.

C. Prior to executing a contract with the City, the awarded organization(s) must be registered with the State as either Colorado or foreign entities and must be in good standing. Proof of such standing is required prior to the start of the contracting process.

D. Prior to executing a contract with the City, the awarded organization(s) must be registered on www.SAM.gov and provide a Unique Entity Identifier (UEI) number.

E. Prior to executing a contract with the City, the selected organization(s) will be required, at their own expense, to secure and deliver to the City a current Certificate of Insurance (COI) showing coverage for all required insurance prior to initiation and execution of any contractual agreement. Please see Attachment 5 for more details about City insurance requirements.

F. Contractor personnel may be required to take certain City trainings and/or abide by certain City policies and procedures.

G. Organizations that are selected must provide the following to begin the contracting process:
   i. Completion of the City's certification regarding debarment, suspension, and other responsibilities form. (Attachment 4)
   ii. IRS form W-9 for organization.
   iii. Current certificate of insurance.
   iv. Register with the Colorado Secretary of State and maintain good standing status.

IV. Funding and Term

A. Solicitation Process.
   i. It is the City's intent to encourage maximum competition and enter into a contractual agreement with the selected organization(s) based upon the scope of services outlined within this proposal and the subsequent revision (if necessary) to the scope based upon negotiations.

ii. The proposal should contain the total cost of your proposed services. For purpose of the RFP, the Respondent is to provide a detailed work plan describing the costs associated with the proposed budget and the cost methodology.
iii. The City anticipates refinement of the final scope of services during the contract negotiation process.

B. Funding and Term
i. Contract Structure. The City anticipates awarding a master agreement for an initial term of three (3) years starting May 1, 2027, through April 30, 2030, with the option to extend the agreement for additional term(s) at the City's sole discretion.
ii. Maximum Contract Amount. The anticipated maximum contract capacity for the initial three-year term is $450,000. The maximum contract amount does not constitute a guarantee of expenditure, minimum purchase commitment, or guarantee of work.
a. Funds for this RFP are sourced through local City general administration funds.
iii. Task Orders. Individual projects, repairs, installations, expansions, and other non-recurring services may be authorized through written task orders issued under the resulting master agreement. Each task order may identify the scope of work, deliverables, schedule, equipment, estimated labor, applicable contract rates, and maximum authorized amount.
a. The Contractor shall not begin billable task-order work before receiving required City authorization, except when expressly authorized under established emergency-service procedures.
iv. All contracts, contract amounts, task orders, and extensions are contingent upon need, funding availability, Contractor performance, and required City approvals.
v. The City may award one or more providers.
vi. Contracts are subject to audit by City departments, the City Auditor's Office, and other authorized officials.

C. Deliverable-Based Fee Schedule.
Respondents must submit a deliverable-based, fee-driven budget that aligns with their proposal and accounts for all costs. Payments will be issued upon successful completion of deliverables.
i. Proposal budgets must include detailed budget narratives explaining costs for milestones or deliverables throughout the project timeline. This should cover time and materials for meetings and any other proposed deliverables.
ii. Each budget narrative must specify resources, including professional hours and pay rates, used to determine milestones or deliverable fees. Fees must be fair and reasonable for successful completion of deliverables.
iii. All costs must comply with the cost instruction guidelines below and comply with the guidelines in the following sections: Allowable Costs, Unallowable Costs, Indirect, Administrative, and Facilities Costs. No milestone or deliverable fee may include costs outside these parameters.
iv. Budgets will be evaluated based on clarity, fairness, and transparency of cost estimates. Respondents should indicate when rates reflect their standard commercial pricing, as this may be accepted as justification for certain costs (e.g., base curriculum fees).

v. Milestones and deliverables may be structured at the respondent's discretion, provided they align with their proposal and business model. Fees will be reviewed and negotiated during contract development post-award.

D. Allowable Costs.
   i. Allowable costs are those costs consistent with the principles set out in 2 CFR 200, Subpart E – Cost Principles. A cost charged to an award must be:
      a. Allocable to the award under the provisions of the applicable cost principles.
      b. Necessary and reasonable for proper and efficient performance and administration of the grant or cooperative agreement.
      c. Treated consistently as a direct or indirect cost.
      d. Determined in accordance with the Generally Accepted Accounting Principles, except as otherwise stipulated in the applicable cost principles.
      e. Not included as cost or used to meet the cost-sharing or matching requirements of another federal award, unless specifically permitted by federal law or regulation.
      f. Adequately documented.
      g. Authorized or not prohibited under state or local laws and regulations.
      h. In conformance with limits or exclusions on types or amounts of costs, as set forth in the applicable cost principles, federal laws, award terms and conditions, or other governing regulations.
      i. Consistent with the recipient's policies, regulations, and procedures that apply to both federal awards and other activities of the recipient.

E. Unallowable Costs.
   i. The City will not reimburse contractors for certain expenses, known as unallowable costs. If a cost cannot meet the criteria of reasonableness, allowability, allocability, and consistency, it is unallowable. Common unallowable costs include entertainment, alcohol, fundraising, bad debt and certain travel expenses.

V. Proposal Response

The RFP packet is designed to provide sufficient information for Respondents to prepare and submit a complete and responsive packet with the "Proposal Certification Form" and required documents and/or attachments. All responses should provide a straightforward, concise description of qualifications.

A. Required Proposal Documents. For a proposal to pass technical review, the following documents must be present and complete in the Respondent's BidNet submission on or before the proposal due date:
   i. Proposal Certification and Checklist Form (Attachment 1)
   ii. Proposal Narrative, not to exceed 12 pages (see Attachment 2 for prompts)
   iii. Proposal Budget & Fee Schedule (see Attachment 3 for template)
      a. These documents will not be included in the total number of pages allowed for the narrative.
   iv. Certification Regarding Debarment, Suspension and Other Responsibility Matters (Attachment 4)

a. Federal law implementing Executive Order 12549 requires that each prospective Respondent certify that it and its principals are not: debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded by any federal department for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (federal or state or local) transaction or contract under a public transaction; or in violation of federal or state antitrust statutes or are indicted for or otherwise criminally or civilly charged with a commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property.

v. Organization Certifications and Key staff job descriptions or resumes (see paragraph II.D for details)
vi. Current certificate of insurance (see Attachment 5 for insurance requirements and sample COI)
vii. Compliance with Contract and Insurance Certification Form (Attachment 6) and current Certificate of Insurance
viii. IRS form W-9 for organization
ix. IRS 501(C)(3), Certificate of Good Standing with Colorado Secretary of State, State Corporation Papers, or City Agency

B. Additional Documentation Requested for Proposal. Please indicate on proposal checklist if not applicable:
i. Most Recent IRS Form 990
ii. Current Agency Annual Budget
iii. Most recent Independent Audit, Financial Review or IRS Tax Forms
iv. List of Board of Directors with occupations and affiliations of primary organization
v. Non-discrimination statement and policy for primary organization and/or collaborative entities
vi. Copy of policies pertaining to Data Confidentiality, Retention, and Destruction Policy

VI. Evaluation, Selection, and Award Process

A. Technical Review.
i. All submitted proposals are subject to a technical review for completeness. A proposal must pass technical review to move forward in the evaluation process. Proposals which fail to provide all the required information and materials in response to the RFP will be determined not to pass technical review and will be disqualified from consideration.

B. Review Committee.

i. Proposals that pass technical review will move on to Review Committee. Committee members will independently evaluate the proposals based on the following criteria:

Category	Description	Weight
Qualifications, Experience, and Capacity	The extent to which the Respondent demonstrates relevant organizational experience, technical capacity, staffing resources, manufacturer qualifications and certifications, and qualified key personnel necessary to successfully support the existing DHS access control environment. Evaluation will consider demonstrated experience supporting LenelS2 NetBox and comparable multi-site or complex environments, the qualifications and experience of personnel proposed for DHS, organizational staffing and backup capacity, and the Respondent's demonstrated ability to maintain, troubleshoot, expand, and upgrade an existing access control system.	25%
Technical Service Delivery and Implementation	The extent to which the Respondent presents a clear, technically sound, and feasible approach to delivering the services required by this RFP. Evaluation will consider the Respondent's approach to preventive and corrective maintenance, troubleshooting, repairs, emergency response, technical escalation, staffing continuity, operational risk management, and transition from the incumbent provider. Particular consideration will be given to the Respondent's ability to assume full operational responsibility while maintaining system availability, continuity of service, and required service levels throughout the transition and contract term.	35%
Performance, Lifecycle Management, Cybersecurity, and Contract Support	The extent to which the Respondent demonstrates a structured approach to managing system performance, lifecycle risks, documentation, cybersecurity, and ongoing contract support. Evaluation will consider the Respondent's ability to monitor and meet established KPIs and service levels; identify obsolete, unsupported, failing, or end-of-life components; maintain accurate system and service documentation; securely manage system access and remote support; coordinate with appropriate City departments; identify and address recurring technical issues; and provide proactive recommendations that support long-term system reliability and planning.	20%
Proposed Budget and Pricing Narrative	The extent to which the Respondent provides complete, transparent, competitive, and clearly supported pricing for the services required by this RFP. Evaluation will consider labor rates, recurring support costs, equipment and material pricing and discounts, emergency and after-hours charges, software or manufacturer support costs, proposed price adjustments, and other applicable charges. Evaluation will also consider whether pricing assumptions, exclusions, and dependencies are clearly identified and whether the proposed pricing provides the City with sufficient transparency to evaluate anticipated contract costs and overall value.	20%

ii. The Review Committee will review proposals by completing a proposal evaluation form for each submission passing technical review. A composite rating will be developed which indicates the group's collective ranking of the highest rated proposals in a descending order. The Review Committee will evaluate the proposals and may also ask questions of a clarifying nature from Respondents, as required.

C. Interviews.
   i. The City may request oral presentations and/or interviews as part of the review process in order to gain a better understanding, by all parties, of the work to be performed.
   ii. Respondents selected to be interviewed will be contacted and scheduled, in no particular order, to meet with the Review Committee or a representative of DHS at the City's sole discretion.
   iii. The purpose of an interview is to gain a better understanding, by all parties, of the work to be performed.
   iv. Interviews will be held during regular working hours.
   v. During the interview, additional general and/or budget information may be requested.
   vi. Any additional information provided by the Respondent during the interview will become part of the submitted proposal and, subsequently, may be part of the final contract.

D. Notification of Award
   i. The award will be given to the Respondent whose proposal meets the requirements of the RFP and is determined to be most responsive, responsible, and best value to the City, in accordance with the provided scoring criteria, community needs, and the Denver Revised Municipal Code (D.R.M.C.).
   ii. Respondents with successful proposals will be noticed through e-mail.

E. Contracting
   i. Any award due to this RFP will be contingent upon the execution of an appropriate contract.
   ii. The Sample Contract in this RFP contains proposed terms and conditions. These terms and conditions, along with the Scope of Work, and/or technical requirements shall form the basis of a Contract Agreement covering the subject matter of this RFP.
   iii. Services and payment may commence upon the complete execution of a signed agreement between the successful Respondent and the City.

F. Respondent RFP Action Items
   i. Complete Proposal Checklist and Certification Form (Attachment 1)
   ii. Complete Proposal Narrative (Attachment 2)
   iii. Complete Budget & Fee Schedule Template (Attachment 3)
   iv. Complete Certification Regarding Debarment, Suspension and Other Responsibility Matters (Attachment 4)
   v. Obtain and Submit Certificate of Insurance (see Attachment 5 for details)
   vi. Review Sample Contract Agreement (Attachment 7)
   vii. Complete Contract and Insurance Compliance Certification Form (Attachment 6)

viii. Gather additional requested documentation:
   a. Obtain Organization Certifications and Key Staff Job Descriptions or Resumes
   b. Obtain IRS 501(C)(3), Certificate of Good Standing with Colorado Secretary of State, or State Corporation Papers, or City Agency
   c. Obtain most recent IRS Form 990
   d. Obtain current Agency Annual Budget
   e. Obtain most recent Independent Audit, Financial Review or IRS Tax Forms.
   f. List of Board of Directors with occupations and affiliations of primary organization.
   g. Obtain non-discrimination statement and policy for primary organization and/or collaborative entities.
   h. Obtain copy of Data Confidentiality, Retention, and Destruction Policy.
