Q: Is there a minimum amount of inventory for material? Example 12 streetlight poles, enclosures, fuse kits, etc. Can material be stored in a Conex on Boulders property?

A: The City will provide most materials needed for the contract. The exception would be smaller bulk items like wire nuts or crimps that the contractor might normally have in stock. The city is able to provide outdoor storage space at the Municipal Service Center yards but the contractor would need to provide their own Conex, if desired.

Q: Can equipment be stored on Boulder property?

A: The City is able to provide outdoor storage space at the Municipal Service Center yards but the contractor would need to provide their own Conex, if desired.

Q: Are contractors required to submit rates for all pricing categories and all work types?

A: Yes

Q: What are the City of Boulder's standard payment terms?

A: Once work has been inspected and approved by the Streetlight Operations team, invoices will be processed within 30 days of the invoice date.

Q: Is there a projected crew count &/or anticipated volume of work?

A: As stated in the RFB, the bidder shall maintain sufficient equipment, personnel, and resources to respond to emergency service requests and be on site and prepared to commence work within one (1) to one and a half (1½) hours of notification by the City. Volume of work will be dependent on contractor availability, operational budget limits, and the contract maximum. The maximum contract budget is currently $2 million over 5 years. The City may increase the amount of work or extend the work period, as necessary, provided the increased scope concerns substantially the same services.

Q: Will the City of Boulder allow escalation for fuel, labor, equipment, insurance, subcontractors, or annual CPI/market adjustments during the contract term?

A: The City will allow small annual increases, limited to one per 12-month period and not exceed 4% year-over-year.

Q: Who obtains and pays for road permits, ROW permits, traffic control permits, environmental permits, railroad permits, municipal permits, and private access agreements?

A: This hasn't been necessary in the past but if any permits are required, the contractor would submit the application and then submit an invoice for the City to pay. Private access will be handled on a case-by-case basis.

Q: Who is responsible for furnishing and paying for imported backfill, flowable fill, topsoil, seed, mulch, erosion control materials, and other restoration materials?

A: Materials should be included in the corresponding line-item pricing.

Q: Who performs switching, clearance issuance, and customer outage notifications?

A: If necessary, contractor would coordinate work with Xcel Energy.

Q: For directional boring, please confirm whether potholing, bore pits, drilling fluid, spoils handling/disposal, vacuum excavation, traffic control, restoration, hard-surface repairs, bore logs, failed bores, and frac-outs are included in the bore unit or paid separately?

A: Materials and disposal should be included in the corresponding line-item pricing.

Q: Who is responsible for trash, packaging, pallets, reels, spoils, HDD mud, concrete/asphalt debris, removed pole butts, and general construction debris disposal?

A: Disposal should be included in the corresponding line-item pricing.

Q: Since the final contract amount is not yet known and will be based on quantities of time and materials that have not yet been determined, how should we calculate the bid bond for this RFB? Is there a specific dollar amount you would like us to use as the basis for the bond?

A: The City anticipates that the first year of work will not exceed $350,000. Accordingly, the City requests a bid bond amount of $17,500 (5% of first year work).

Q: How will mobilization be handled for the unit pricing line items?

A: Mobilization should be included in the unit pricing for each line item.

Will contractors be required to stock any of the materials needed for this contract and will Boulder provide a storage area or will the contractor need to inventory this material?

The City will provide most materials needed for the contract. The exception would be smaller, bulk items like wire nuts or crimps that the contractor might normally have in stock. The City is able to provide outdoor storage space at the Municipal Service Center yards but the contractor would need to provide their own Conex, if desired.
