PROJECT NO. B-4799
Ash Tree Treatment

ADDENDUM NUMBER ONE

Scope of this Addendum

This Addendum Number one serves to distribute the Updated Pricing Sheet for IFB #B-4799. These modifications have been deemed necessary by the City of Aurora.

If you have any questions or concerns regarding this addendum document, please contact Zac Felts at ZFelts@auroragov.org.

This Addendum Number One supersedes and/or supplements all portions of the Contract Documents with which it conflicts.

The total number of pages contained in this Addendum Number One is one (1) cover page and one (1) attachment.

Attachment A
Pricing Sheet

Treatment Types	Cost /Dbh inch			Remarks
Abamectin Benzoate (minimum 4% active ingredient) **Application:** Trunk injection at the root flare area using manufacturer-approved closed-system injection equipment	Low Dose	Medium Dose	High Dose	
Dinotefuran (Neonicotinoid) **Formula:** Safari, Transect **Application:** Soil drench including watering of trees after application				

Note: When pricing between the two treatment methods is inconsistent—such as one method being higher and the other lower for different bidder, or when neither method's pricing is clearly the lowest—Trunk Injection will be used as the primary basis for contractor selection, as the city intends to maximize the number of trees treated using this method. Soil Drenching will be considered a secondary option and used only for treating smaller trees when necessary.
